

# Programme of the 3rd workshop on the role of H2020 Thematic Networks (TNs) in EU Agricultural Innovation

Organised by Copa-Cogeca, TN leaders, SWG SCAR-AKIS, DG AGRI. Hosted by Copa-Cogeca

June 11, 2019, 13.00-17.00, Copa-Cogeca, Trierstraat/Rue de Treves 61, 1040 Brussels

Dear invitees for the workshop on Thematic Networks.

In a few years already 29 Thematic Networks (TNs) have brought knowledge of research and practice together and translated this in ready-to-use insights, overviews and recommendations. They increase knowledge translation and co-creation on specific themes and thus speed up innovation and implementation. They supported learning and innovation in agriculture, and they opened doors between groups and sectors.

This 3th workshop on TNs focusses on the question: how do these TNs learn from efforts?

**3 projects show their approach on supporting effective mutual learning.**

**10 TNs will show tangible examples** where lessons learnt helped to increase impact.

Furthermore, the newly accepted TN's 2019 will be introduced.

We show how TNs can link with other TN's and EIP Operational Groups

13.00	Registration
13.30	Welcome and position of Copa Cogeca in EIP/ MAA/ Research / Thematic Networks, by Mr Daniele Rossi, Chairman of the WG Science, Copa-Cogeca
13.40	<b>Update on the EIP AGRI and AKIS in post 2020 CAP</b> by Inge Van Oost, including the news, which additional TNs are granted in 2019.
14.00	The H2020 Multi-Actor projects LIAISON <sup>1</sup> , EURAKNOS <sup>2</sup> and FAIRshare <sup>3</sup> will show how they <b>explore synergies and enhance engagement among these TNs</b> and other projects <i>and</i> they show how they work together: LIAISON optimizes the innovation processes, EURAKNOS ensures capturing of knowledge produced and FAIRshare enhances use of ICT tools to effectively advise farmers with knowledge.
14.30	Exchange experiences <i>and</i> bringing value to the farmers, from different perspectives on <b>value chains</b> : ENABLING, AGRIFORVALOR, INCREDIBLE, SKIN. (descriptions and start-of-the-art of TNs will be sent end May)
15.00	Coffee break
15.30	<b>Pitches from 6 TNs from the 2016-2017 calls</b> A selection of the Thematic Networks in the list will show objective and progress in the last year. The pitches are a starter for the mini discussion groups. (short before the meeting you will get a link to extra information in the web)
16.00	Mini discussion group sessions: Open agenda, discuss subjects related to the TN. For all groups: give short suggestions to 2 questions: <ul style="list-style-type: none"> <li>• "How can Thematic Networks interact better with farmers and speed up innovation?", and</li> <li>• "How can Thematic Networks work together and engage with other projects?"</li> </ul>
16.30	Interactive (menti) summary on the possibilities on learning and final remarks by chairman
16.40	End of meeting

yr	Thematic Network
14	AgriSpin HENNOVATION OK-Net-Arable WINETWORK
15	4D4F AGRIFORVALOR EUFRUIT EuroDairy FERTINNOWA HNV-link SMART-AKIS
16	AFINET CERERE EU PiG Inno4Grass SheepNet SKIN
17	ENABLING INCREDIBLE INNOSETA NEWBIE OK-Net Ecofeed PANACEA
18	BEST4SOIL DISARM EURAKNOS Legumes Translated NUTRIMAN SuWaNu Europe

<sup>1</sup> **LIAISON** investigates interactive innovation approaches and aims to explore and develop means to optimize and speed up innovation processes in agriculture, forestry and the rural economy. LIAISON studies TNs, innovation projects, networks and initiatives.

<sup>2</sup> **EURAKNOS** is a TN that maps knowledge within each TN and designs a common datasystem to make this knowledge Findable, Accessible, Interoperable and Reusable (FAIR) for the agricultural innovation community.

<sup>3</sup> **FAIRshare** makes digital tools and services FAIR with an online inventory. In a participatory 'living lab' advisors can interact with the inventory and exchange, co-adapt, co-design and apply digital tools.
