Poland and the Netherlands have a long tradition on collaboration and as strategic partners on water. To build on this tradition and discuss mutual opportunities and collaboration on issues such as climate resilience and drought, the Netherlands Water Partnership together with the Enterprise Europe Network (EEN) are organizing a virtual matchmaking mission to Poland from 21-23 June 2021.

The mission will contain both matchmaking opportunities as well as sessions which will deepen your understanding and knowledge on topics such as climate resilience, smart solutions and drought management. Furthermore, financing opportunities specific for bilateral cooperation and business development are discussed in detail.

To register for this matchmaking mission, please go to <https://virtual-mission-poland.b2match.io/>

When registering please provide the following information:

- Add a comprehensive yet short company profile
- Add one or more marketplace items, in which you provide information about the technology, service, knowledge or expertise you are either looking for or which you have on offer.

For more information please contact [Magdalena.Glogowska@ncbr.gov.pl](mailto:Magdalena.Glogowska@ncbr.gov.pl)

The mission is financed by the Partners voor Water programme
